# A Women Safety & Security App

We strengthen her to nurture and transform.

1

## Safe Location Prediction

On entering the location, the user receives information about whether the place is safe or not.

2

## File A Complaint

If a girl or woman is assaulted, the victim can directly complain about the accused; instantly the organization approaches her and the job is done.

3

## Tactics

All sorts of self-defense techniques are shown on the module, which inspires them to protect themselves in difficult times. This includes blogs and videos of it.

4

## Chat With Organization

At any instance, the organization will be available to communicate with the victim and can help her in facing and overcoming the issue.

5

## Emergency Contacts

User can update the contacts to those she is willing to share live location at an unsafe situation in the profile.

## 3 Simple Steps

### Login To the Website

User has to first login to the website and verify the credentials.

### File A Complaint

Need to enter all the details related to the issue and upload the copies of the assault.

### Resolve the issue

The form is sent to the mentioned organization by the user. They now directly approach her without revealing her identity.
