### **DECLARATION BY THE CANDIDATES**

We, **K.KRISHNA , KALERU RUSHITHA,UVRAJANA SNEHA** bearing hall ticket numbers, **1602-19-737-077, 1602-19-737-090, 1602-19-737-107** hereby declare that the project report entitled “**FEMZO**” under the guidance of **Haseeba Yaseen Mam**, Department of Information Technology, Vasavi College of Engineering, Hyderabad, is submitted in partial fulfilment of the requirement of **MINI PROJECT** of V semester of **Bachelor of Engineering in Information Technology**.

This is a record of bonafide work carried out by us and the results embodied in this project report have not been submitted to any other university or institute for the award of any other degree or diploma.

**K.KRISHNA:1602-19-737-077**

**K.RUSHITHA: 1602-19-737-090**

**U.SNEHA: 1602-19-737-107**

**BONAFIDE CERTIFICATE**

This is to certify that the project entitled " **FEMZO**" being submitted by , **K.KRISHNA, KALERU RUSHITHA,UVRAJANA SNEHA** bearing **1602-19-737-077, 1602-19-737-090, 1602-19-737-107** in partial fulfilment of the requirements for the completion of MINI PROJECT of Bachelor of Engineering in Information Technology is a record of bonafide work carried out by them under my guidance.

**Internal Guide**

**HASSEBA YASEEN**

**Dr. K. RAM MOHAN RAO**

**HOD, IT**

## ACKNOWLEDGEMENT

The satisfaction that accompanies the successful completion of the project would not have been possible without the kind support and help of many individuals. We would like to extend my sincere thanks to all of them. We would like to take the opportunity to express our humble gratitude **HASEEBA YASEEN Mam**(Professor) under whom we executed this project. We would also use this opportunity to thank our Head Of Department Dr. K.Ram Mohan Rao. We would also like to thank all faculty members and staff of the Department of Information Technology for their generous help in various ways for the completion of this project.

Finally, we would like to express our heartfelt thanks to our senior **Benitha Tripuraneni (1602-18-737-014)**. We are grateful to her guidance, and constructive suggestions that helped us in the preparation of this project. Her constant guidance and willingness to share her vast knowledge made us understand this project and its manifestations in great depths and helped us to complete the assigned tasks.

## ABSTRACT

The safety of women is a concern of increasing urgency in all the countries across the world. The primary issue in the handling of these cases by the police lies in constraints preventing them from responding quickly to calls of distress. These constraints include not knowing the location of the crime, and not knowing the crime is occurring at all: at the victim's end, reaching the police assuredly and discreetly is a challenge. The atrocities against the women can be brought to an end with the help of our product "**FEMZO**". This device is a security system, specially designed for women in distress. Our product basically helps the victim to file a complaint and immediately she will be assisted by the organizations. To verify the gender of the user the system inquires them to upload any Government Identity Proof. Also, on an emergency note the victim can have a conversation with the organization. Users can list out all the tactics shown in the website, which will be helpful for them in uncertain times. They can locate the help centres and can get the details of them. Chat feature is provided in the system for user's queries with the organization. The system consists of this special feature where the user can enter the destination and it will predict and will intimate whether the place is safe or not. Once the victim files the complaint a confirmation message will sent to the victim's registered email address.

# **CHAPTER 1**

## **INTRODUCTION**

Femzo is a web application which we have developed to provide a platform for women/girls who get threatening calls and face physicals and mental abuses in day-to-day life and social media. Our project helps them to approach the nearby help centres and she teams in case of emergency. The victims can file a complaint to resolve their issue, this whole process happens without the victim's name unrevealed.

### **1.1 Motivation**

A Woman is not much powerful when compared to men physically, in a crisis situation and needs a helping hand to relieve them. The best way to minimize chances in becoming a victim of violent crime (robbery, sexual assault, rape, domestic violence) is to identify and call on resources to help you out of unsafe situations. Whether you are in instant trouble or got separated from friends during night and do not know how to get home, having this website “**FEMZO**” on your phone can diminish your risk and bring assistance when you require it.

A swarm of new websites have been developed to provide security systems to women on their phones. Here, we introduce FEMZO that ensures the safety of women. It reduces the risk and helps us in need by identifying the details of person who is in danger. We ensure the fastest safety measures are provided to rescue her.

### **1.2 Problem Statement**

Women are accomplished at mobilizing diverse groups for frequent causes. They often work across racial, sacred, opinionated, and intellectual divides on basis of sexual mental and physical harassment. We are aware of importance of women's security, but we must recognize that they should be well secured and saved from abusive situations. This problem should be considered as a serious issue and where it can strengthen them to travel anywhere at anytime and complaint about the accused.

### **1.3 Project Objectives**

Most Of the girls fear of confronting the abuses, threats which they go through endlessly. So this project provides a number of solutions to it:

- Empower them by giving the outline to face the problems.
- Encouraging them to address their issues.
- Immediate actions on the accused will be taken by not revealing the identity of the victim by the women safety organizations.
- Suggesting whether the destination place is safe or not before hand .
- Women abuse is halted.

## **CHAPTER 2**

### **Technical Literature**

<https://ieeexplore.ieee.org/document/7373171>

The Women Safety App ‘WOSAPP’ is the first mobile application launched targeting the female citizens for their utmost protection and security. This application provides women with a reliable way to place an emergency call to the police. The user can easily and discreetly trigger the calling function by shaking her phone, or by explicitly interacting with the user interface of the application via a simple press of a PANIC button on the screen.

This was basically a hardware based app ,after seeing this we developed this idea of ‘Femzo’ . This includes the feature of sending location to the emergency contacts, rather than to the police station.

#### **Areas our project can be improved in:**

An efficient platform to punish the accused irrespective of their age.

Generally, girls fear to travel at night and this is the major area which should be looked at in the project.

Also, many of them don’t want to reveal their identity by choice, these details must be kept more confidential.

Alarms can be included when the user is in trouble or unsafe and this can be sent to the nearest police stations.

If the user is in an unsafe situation on a single click photos and instant location should be sent to the emergency contacts

## **CHAPTER 3**

### **Existing Method/System**

#### **3.1 Existing Apps:**

**WOMEN'S SECURITY:** This app is developed by AppSoftIndia. The key features of the app are: the user has to save some details. These details include: Email address and password of the user, Email address and mobile number of the recipient and a text message. . The user can easily and discreetly trigger the calling function by shaking her phone, or by explicitly interacting with the user interface of the application via a simple press of a PANIC button on the screen.

**The Smart24x7** app is supported by the various states' police just to ensure the safety of women and senior citizens. The app sends panic alerts to emergency contacts in a problematic situation. It also records voices and also takes photographs during the panic situation and transfers these to the police as well

#### **3.2 Drawbacks**

- Safe location is done only on few places across India ,but should be identified on all places across India .
- If the mentioned place is not safe application doesnot show top safest places

## **CHAPTER 4**

### **Proposed System**

#### **4.1 System Requirements and Specifications**

##### **4.1.1 Software Specifications**

- **VISUAL STUDIO CODE 1.63:**

Visual Studio Code is a source-code editor made by Microsoft for Windows, Linux and macOS.[9] Features include support for debugging, syntax highlighting, intelligent code completion, snippets, code refactoring, and embedded Git. Users can change the theme, keyboard shortcuts, preferences, and install extensions that add additional functionality..

- **INTERPRETER:**

Visual Studio Code- It features a lightning-fast source code editor, perfect for day-to-day use. With support for hundreds of languages, VS Code helps you be instantly productive with syntax highlighting, bracket-matching, auto indentation, box-selection, snippets, and more.

- **PYTHON-DJANGO:**

##### **Django Framework:**

Django is a Python-based free and open-source web framework that follows the model–template–views (MTV) architectural pattern. Django's primary goal is to ease the creation of complex, database-driven websites. The framework emphasizes reusability and "pluggability" of components, less code, low coupling, rapid development, and the principle of don't repeat yourself.[9] Python is used throughout, even for settings, files, and data models. Django also provides an optional administrative create, read, update and delete interface that is generated dynamically through introspection and configured via admin models.

- **BOOTSTRAP- WEB DESIGNING:**

Bootstrap is a free and open-source front-end framework for designing websites and web applications. It contains HTML- and CSS-based design templates for typography, forms, buttons, navigation and other interface components, as well as optional JavaScript extensions.

#### **4.1.2 Functional Requirements**

##### **R1 User Registration**

R 1.1 The Femzo Application allows the user to enter the login credentials and validates them.

R 1.2 The user can now access all the modules like Complaint form ,safe location prediction and can chat with help centres if the credentials are valid.

R 1.3 Once the user fills the complaint form , all the details of the victim will be sent to the organization .

R 1.4 The user can enter the details of the place and can know whether the place is safe or not.

R 1.5 Also, profile will be updated to the user logged in and can keep track of the complaints she/he filed.

R 1.6 The user can check out the police station details by sharing the police station address.

##### **R2 Un-Registered User**

R 2.1 The Un-Registered User can only check the tactics page which gives the details of self-defence and related blogs.

R2.2 Also, they can find out the safe place by giving the location and similarly police details.

##### **R3 Data Update by Admin**

List of Police station details information management

**R3.1.1** Add new police station .

**R3.1.3** Displaying details of them

#### **R4 Organization Registration**

R4.1 The organization have to login to the website or sign in .

R 4.2 They can take up the cases of the victims which will be displayed in the profile if the credentials are valid.

R 4.3 The organization can directly conversate with the victim.

#### **4.1.3 Non-Functional Requirements**

##### **R5 Security.**

The security requirements are concerned with security and privacy issues. All users information is required by law to be kept private

**R 5.1** The Femzo Application shall support different user access privileges.

**R 5.2** The Femzo Application shall protect every user's information.

##### **R6. Maintainability**

The maintainability requirements are concerned with the maintenance issues of the system.

**R 6.1** The maintenance time of Femzo Application shall be done regularly.

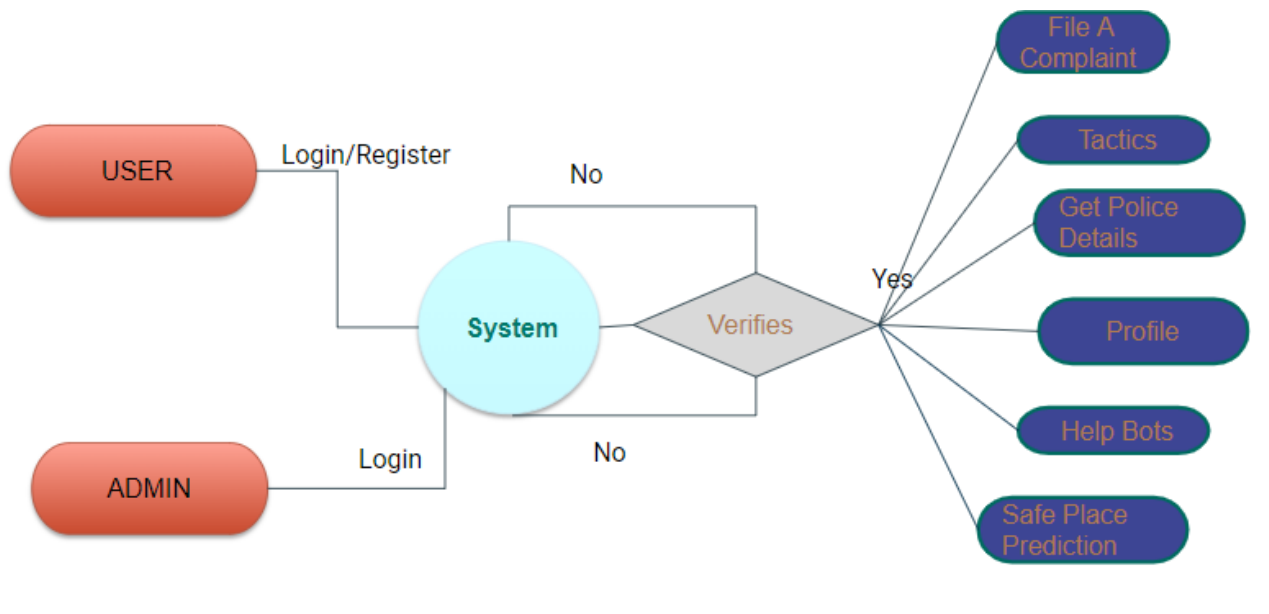

**R 6.2** System down time for maintenance should be less than 6 hours per quarter of a year.

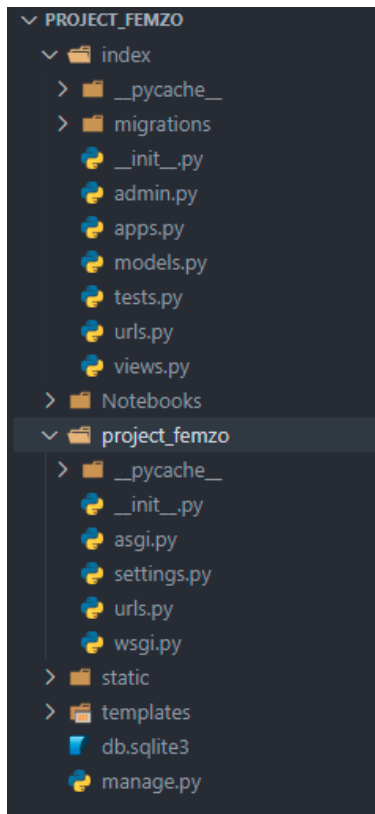

##### **R7. Scalability**

The scalability requirements are concerned with the scalable issues of the system.

**R 7.1** The Femzo Application shall be able to scale up to support more workstations. System performance shall not degrade if up to twenty percent (20%) more workstations are added.

## 4.2 Architecture

## CHAPTER 5

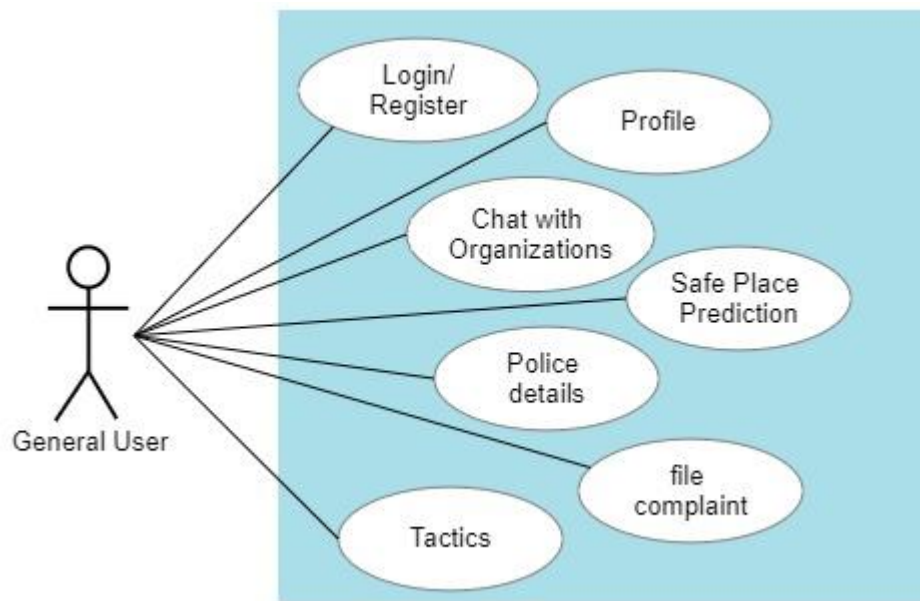

### Design

#### 5.1 UML diagrams / UX diagrams

##### 5.1.1 USE CASE DIAGRAM :

Use case diagrams are the diagrammatic representations depicting users' interactions with the system. This diagram shows different types of users and various ways in which these users interact with the system.

**Registered User:**

**Organization:**

**Registered User with Organization :**

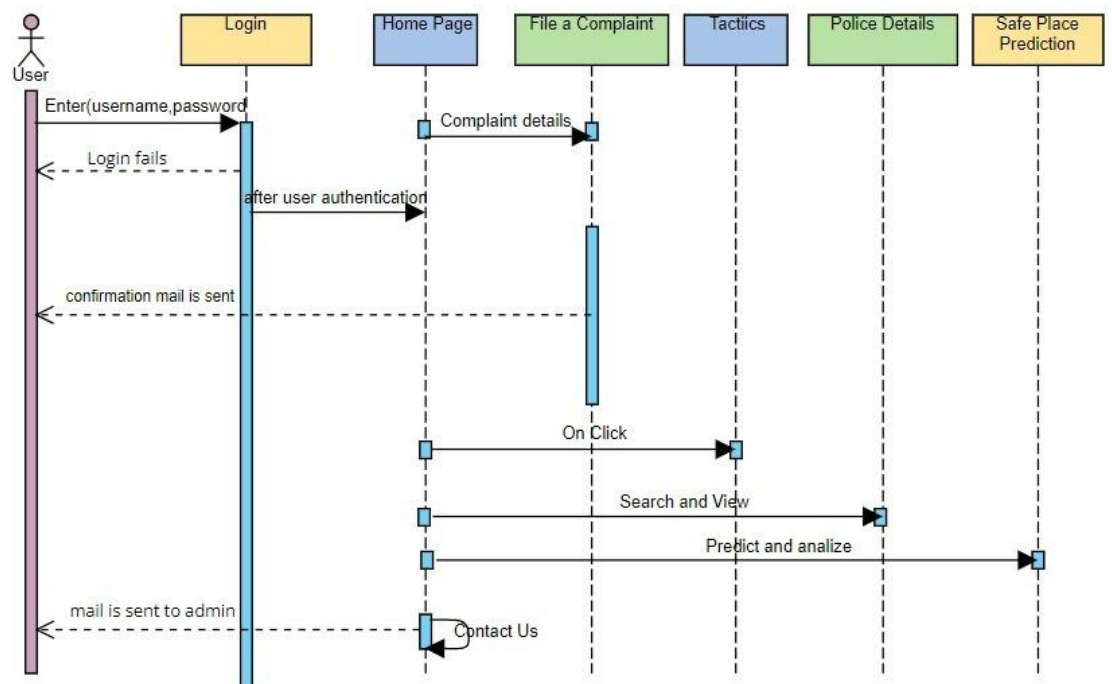

### 5.1.2 Sequence Diagram:

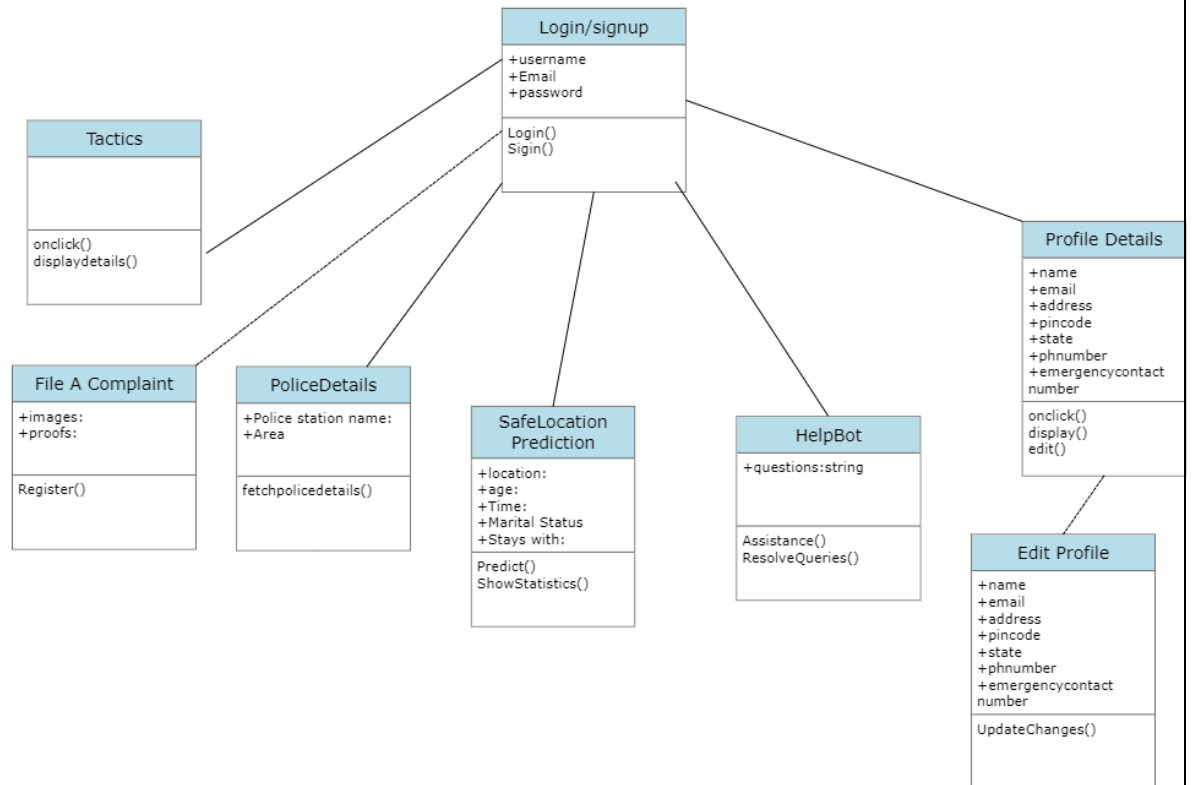

A sequence diagram simply depicts interaction between objects in a sequential order i.e., the order in which these interactions take place. We can also use the terms event diagrams or event scenarios to refer to a sequence diagram.

Sequence diagrams describe how and in what order the objects in a system function

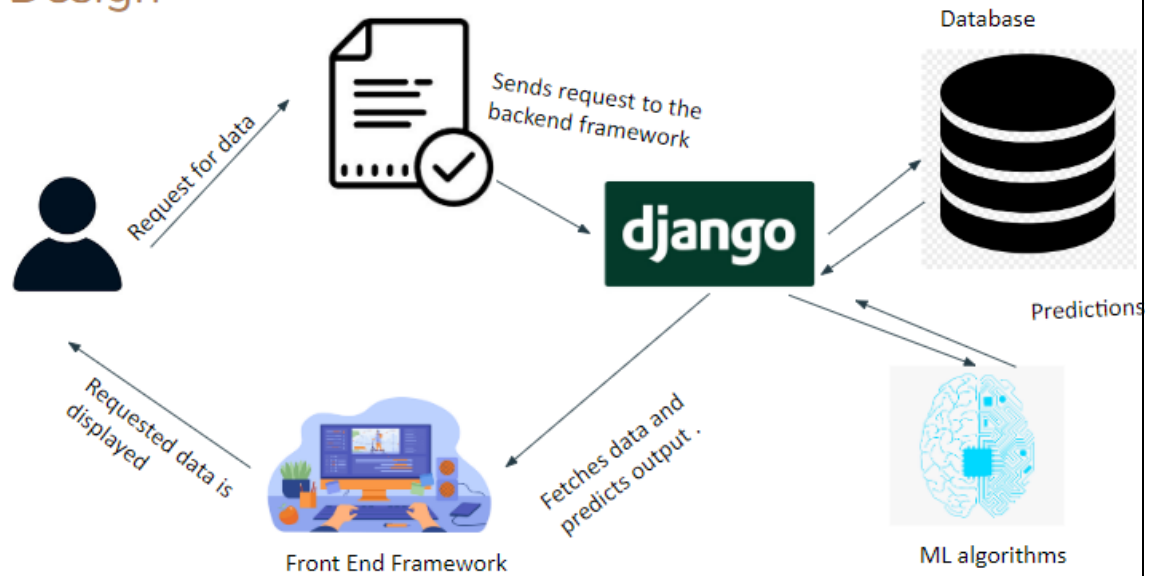

### 5.1.3 Class Diagram:

Class diagram is a static diagram. It represents the static view of an application.

## Design:

### Design

## 5.2 Database schema

Profile:

User(One-to-One), cid number, username, email, mobile, emergency contact details

ProfileDetails:

User(One-to-One relation)

EmergencyContacts :

User(One-to-One), phnumber, holdersname

ContactUs:

name,email,mssg,subject

Complaint:

cid(Primary

key),user\_name,victims\_fname,victims\_lname,contact\_no,email,location,subject,idproof,idproofno,vedio,image,mssg,gender

PoliceDetails:

psname, address ,psemail, psnumber

Organization:

Orgname, phone number, address, complaints solved ,complaints pending,summary images.

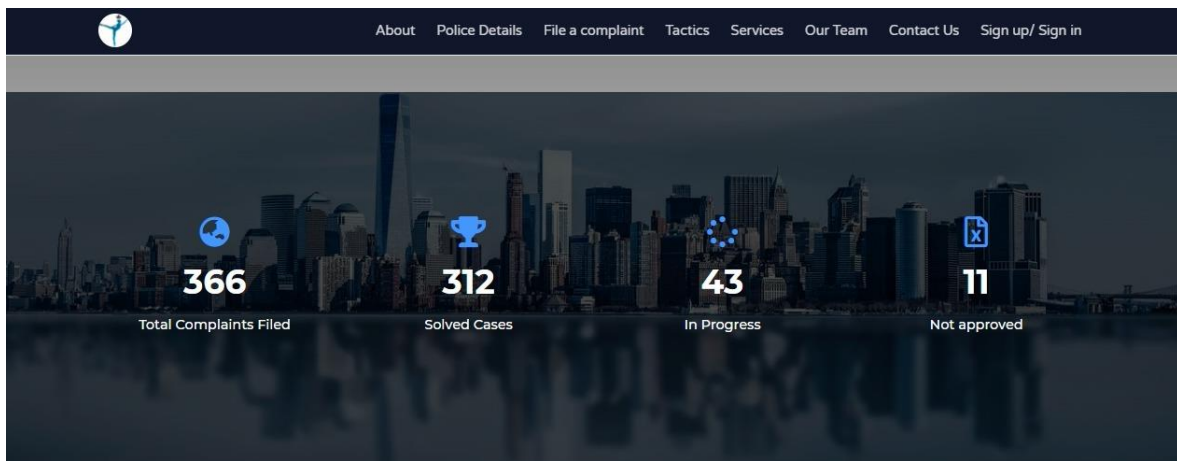

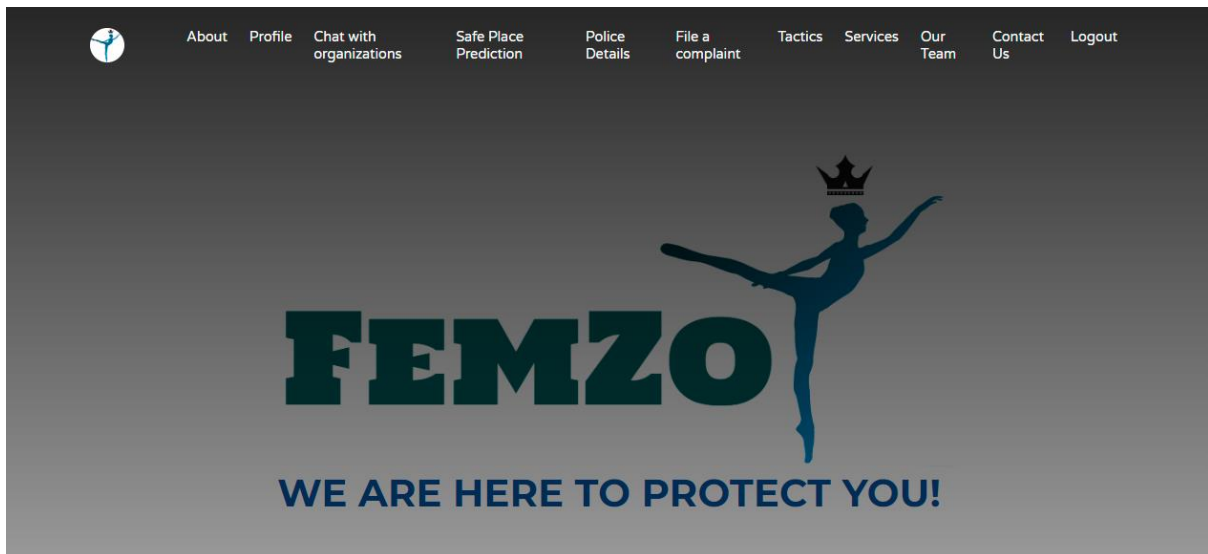

## CHAPTER 6

### Implementation and Testing

#### 6.1 Screenshots and Test cases

##### Home Page:

‘FEMZO’ application includes modules like About, FAC, Tactics, Services, Profile, CAO.SPP

## Welcome To Femzo!

### What Is "Femzo"?

Femzo is a web application which we have developed to provide a platform for women/girls who get threatening calls and face physicals and mental abuses in day-to-day life and social media.

### Why Should You Use "Femzo"?

With the help of this website victims or their companions can (FAC) file an instant complaint by registering and uploading necessary documents, an immediate rescue team will be appointed. She can contact or approach the nearby police stations through our website.

### Pros Of "Femzo"

- i) File an instant complaint & get an immediate response.
- ii) Learn self-defence & rescue yourselves from unsafe situations.
- iii) Get police station details.

## What We Offer

### Filing Complaint

### Instant Chat With Security Organization

### Info Of Help Centers

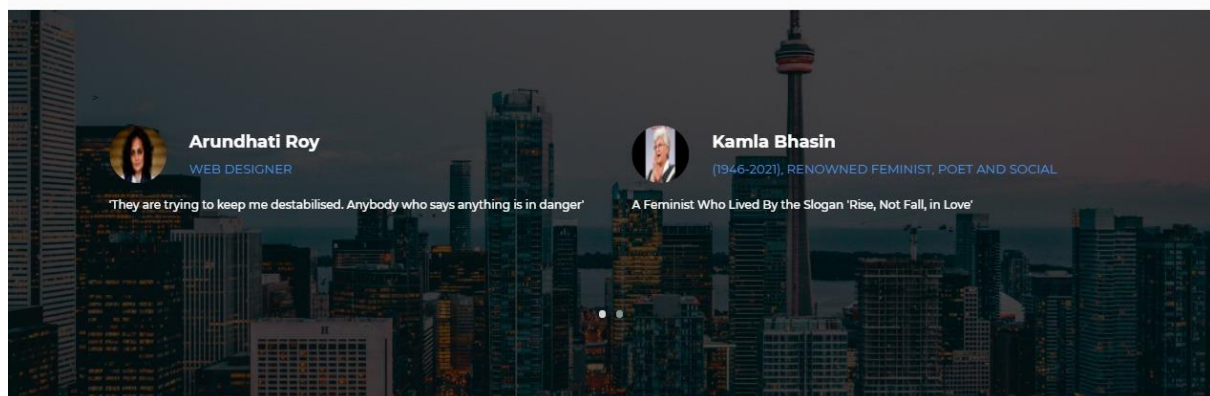

### Protecting User's/Victim's Info

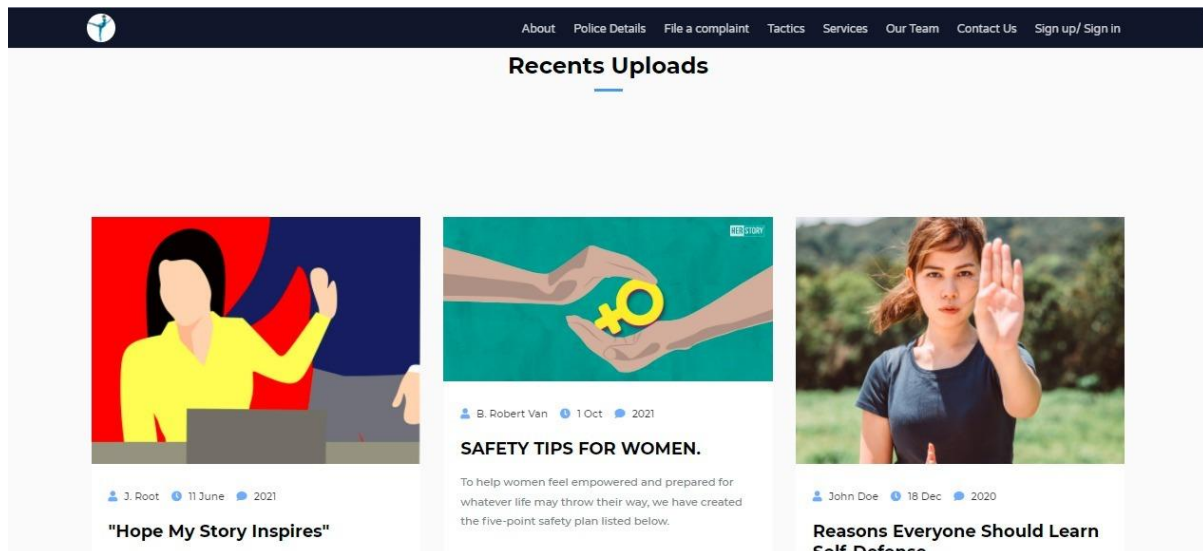

### Blogs On Tactics For Women Safety

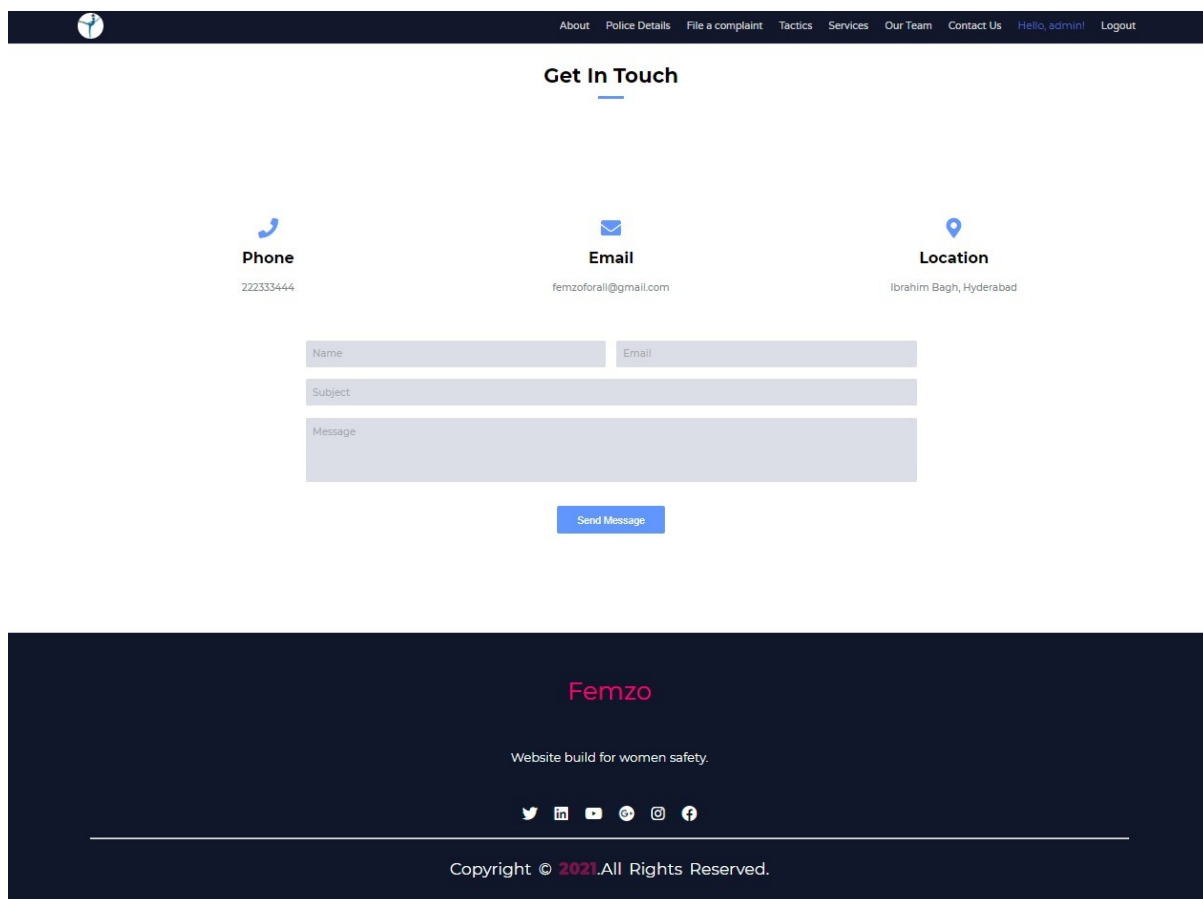

### Place Is Safe Or Not?

- At the footer a Contact Page is available to send an email to femzo admin to resolve queries and to resolve issue

**Login/SignUp:**

At the time of Login the user or the organization should use their respective credentials  
like user:ruhsithakaleru@gmail.com

Organization: womenservice@atu.org

### Register

If you are an organization use .org at the end

Already have account [Login](#)

## Police Details:

On entering the ps name and place. All the details of the police station are displayed.

### Contact Details

Police Station Name

Address

search

View Details

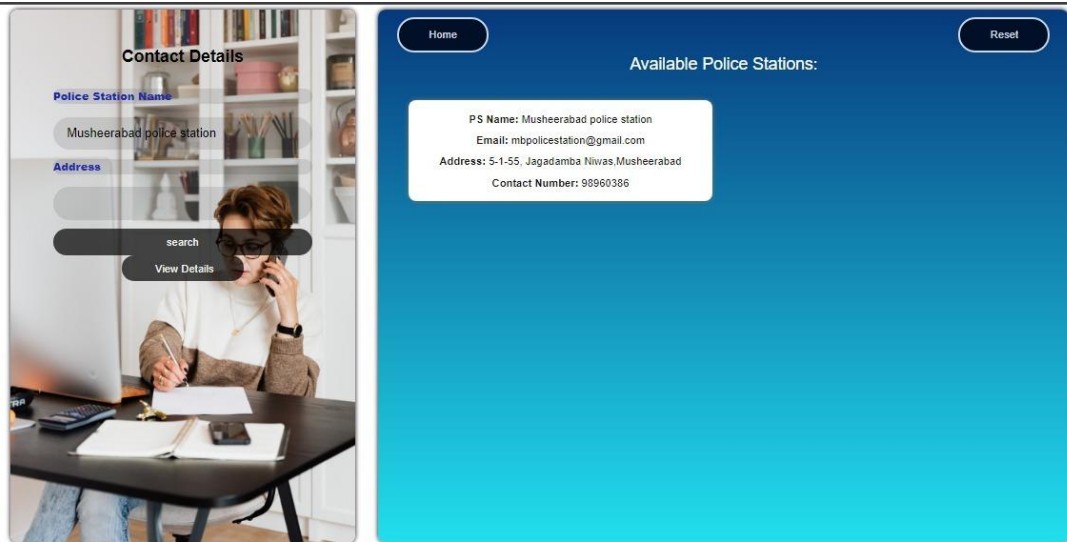

### Available Police Stations:

PS Name: Musheerabad police station  
Email: mbpolicestation@gmail.com  
Address: 5-1-55, Jagadamba Niwas, Musheerabad  
Contact Number: 98960386

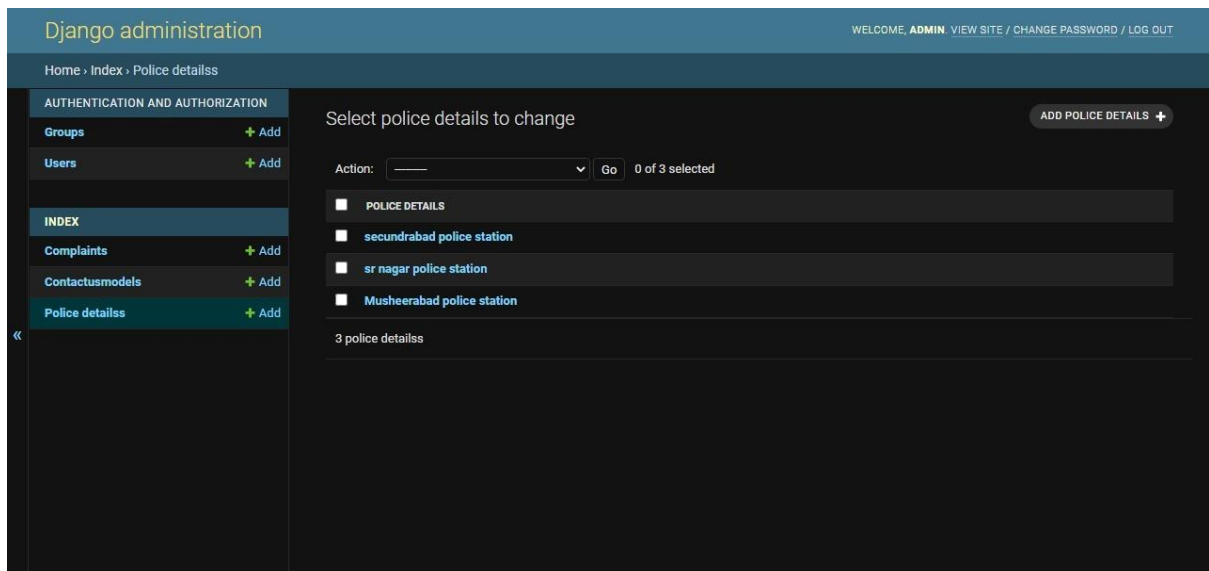

PS Name: sr nagar police station  
Email: smaggpolicestation@gmail.com  
Address: 5-1-55 jagadamba niwas, SR NAGAR  
Contact Number: 78969709333

PS Name: secundrabad police station  
Email: secps@gmail.com  
Address: 5-1-55, Jagadamba Niwas, secundrabad  
Contact Number: 7894594736794

## Search-

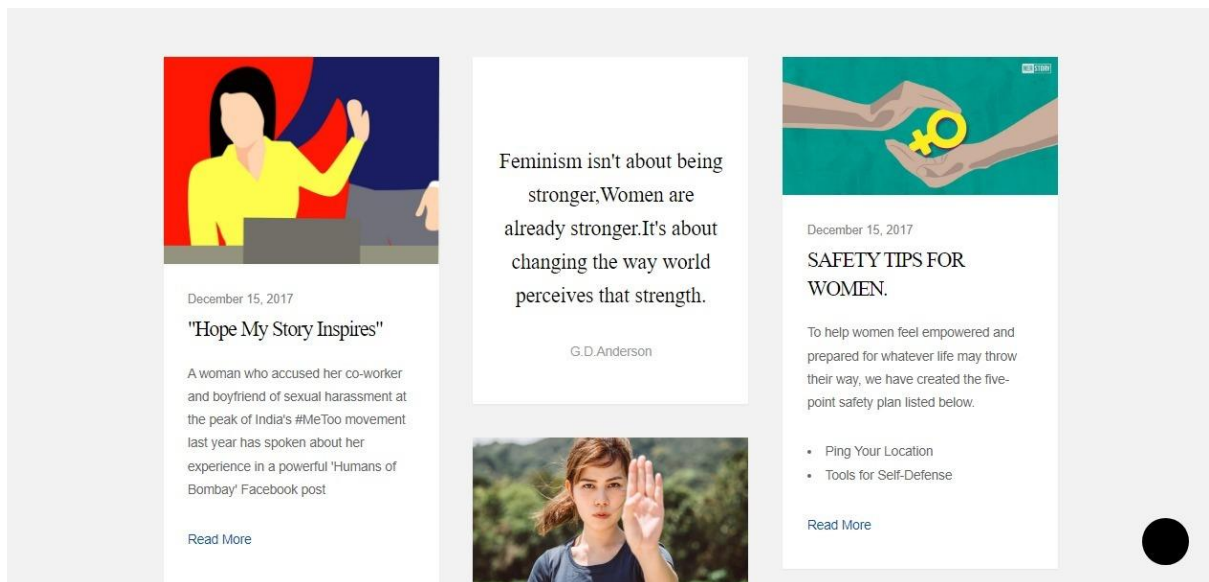

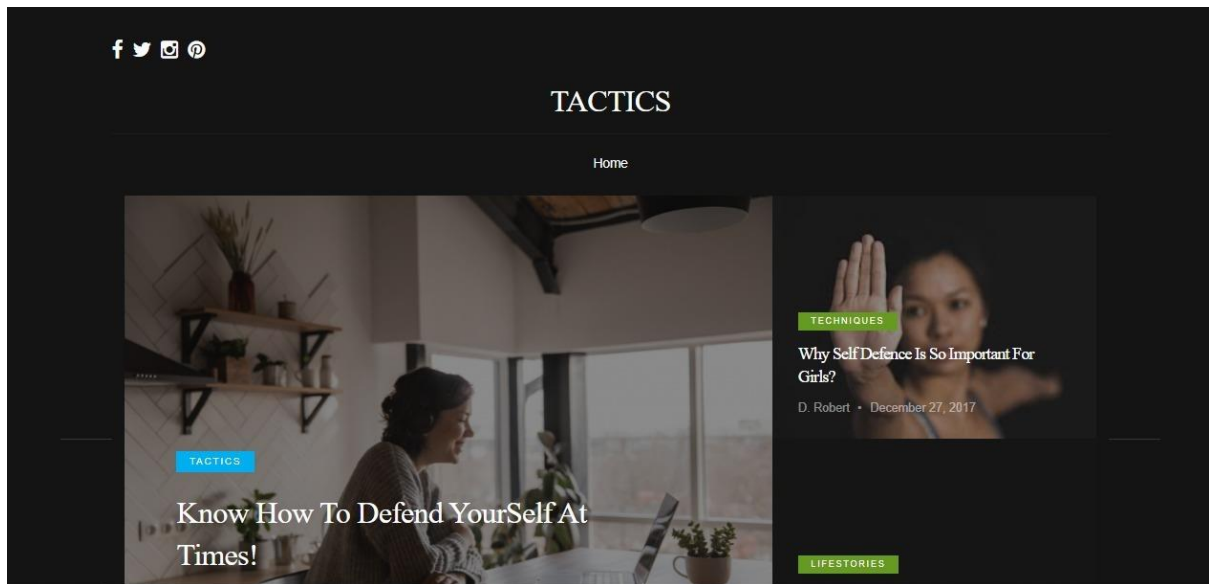

## DATA BASE FORMAT Of Police stations:

## Tactics :

Blogs of the women harassment warriors and leaders are displayed to motivate and guide the users and also self defence techniques are mentioned.

### **File A Complaint:**

This feature allows users to file a complaint on the accused without revealing her identity she get justice through this website

**Safe Place Prediction:** There will be few details given by the user to know location is safe or not, like city ,zone ,time of the day etc.

The screenshot shows a web application titled "Safe Palce Prediction" (note the typo). The interface includes a navigation bar with "Home" and "Safe Palce Prediction" links. The main form contains the following fields and options:

- "Enter your city": Text input field with "Ramapuram" entered.
- "Enter the zone": Text input field with "Aanandam Nagar" entered.
- "Time Of The Day": Dropdown menu with "Night" selected.
- "Rate the Area regard to the No Of People": Dropdown menu with "Medium" selected.
- "Traveling": Text input field with "Married" entered.
- "Traveling": Dropdown menu with "Alone" selected.
- "Submit form": A blue button.

### 6.1.2 HIGHLIGHTED CODE

#### 1) Confirmation Response Mail:

```
@login_required(login_url='signinupform')
def filecomplaintform(request):
    if request.method == 'POST':

### 3) **Auto Detect Current Location:**

```
function getLocation(){
    if(navigator.geolocation){
        document.getElementById("location").placeholder = "Allow to detect location";
        navigator.geolocation.getCurrentPosition(onSuccess,
onError,{enableHighAccuracy:true});
    }else{
        document.getElementById("ip_location").placeholder = "Your browser not support";
    }
}

function onSuccess(position){
    var LAT = position.coords.latitude;
    var LNG = position.coords.longitude;
    var key = '7eef4fe5ef9ed661b775afd23eb8608d';
    let
api_link='https://apis.mapmyindia.com/advancedmaps/v1/'+key+'/rev_geocode?lat='+LAT+'
&lng='+LNG;
    console.log(api_link)
    fetch(api_link)
    .then(response => response.json()).then(response =>{
        let allDetails = response.results[0];
        var area, pincode, city, district, locality, state, street, subDistrict, formatted_address;
        area = allDetails.area;
        pincode = allDetails.pincode;
        district = allDetails.district;
        city = allDetails.city;
        locality = allDetails.locality;
        state = allDetails.state;
        street = allDetails.street;
        subDistrict = allDetails.subDistrict;
        formatted_address = allDetails.formatted_address;
        document.getElementById("location").value = formatted_address;
    }).catch(()=>{
```

```

        document.getElementById("location").placeholder = "Something went wrong";
    });
}

function onError(error){
    if(error.code == 1){
        document.getElementById("location").placeholder = "You denied the request";
    }else if(error.code == 2){
        document.getElementById("location").placeholder = "Location is unavailable";
    }else{
        document.getElementById("location").placeholder = "Something went wrong";
    }
}
}

```

## Safe Location Prediction:

## 6.2 Results

Compared to other devices our website 'FEMZO' has this special feature which no other website or application could provide. Safe Place Prediction and Chat with the preferred organization .The victim or related guardians can file a complaint on the accused and an email will be sent to the help centres immediately after the details are authenticated. Also, the user gets a copy of all the details entered to registered email. The mentioned place is predicted as safe or unsafe with 93% accuracy . The preferred organization takes up and solves the case and the victim can directly communicate with the organization at any time. Also on one click the user location will be sent to the emergency contacts.

### Email Received:

After filling the details immediate confirmation will be sent to the admin and thereby her case will be resolved.

## FireBase Schema:

## **CHAPTER 7**

### **CONCLUSION AND FUTURE SCOPE**

#### **Conclusion:**

We believe that our website will be helpful for women and also any girl who are facing harassments and abuses. Our website will be a one- stop-place to track issues filed, resolving them without the victim's interference. Also after knowing the tactics they can boost up confidence to face an unsafe situation. They can estimate the place is safe or not before hand and can travel accordingly. Also,they can keep track of the complaint filed where no other application provides.

#### **Future scope:**

- Web Scrapping for tactics.
- Alarm System: On a single go they can send alarm sensing the user is in need and send notification to the nearby police station.
- Also, the police station directions can be enrooted on google maps displaying the distance from their current location to the stations.
